### Attention

1 ... 4

**Explanation of symbols** 

= Action 1, 2, 3 ... = Instruction The installation and maintenance of this product must be done under the supervision of an experienced and trained specialist. Never perform work if gas pressure or power is applied, or in the presence of an open flame.

Please read the instruction before installing or operating. Keep the instruction in a safe place. You find the instruction also at www. dungs.com If these instructions are not heeded, the result may be personal injury or damage to property.

Any adjustment and applicationspecific adjustment values must be made in accordance with the equipment manufacturers instructions.

On completion of installation on

This product is intended for installations covered by, but not limited to, the following codes and standards: NFPA 86, CSD-1, ANSI Z21.13, UL 795, NFPA 85, CSA B149.3, NFPA 37 and CSA B149.1.

## **Specification**

KH

Manually operated ball valve for gas piping carrying natural gas, propane, butane, air and inert gases.

Factory Rated Max. Operating Pressure 125 PSI (4225 mbar)

Ambient / Medium Temperature -40 °F ... +300 °F (-40 °C ... +150 °C)

Classification of Valve for up to 2" NPT UL 125 Subject 258 (125 PSI) ANSI Z21.15; CSA 9.1 (0.5 PSI) ANSI B16.33; CSA 3.16 (125 PSI) CSA 3-88 and CGA CR91-002 (125 PSI) ASME 16.44 (5 PSI)

Gases Natural gas, propane, butane & other noncorrosive gases Materials in contact with Gas Housing: Forged brass Seals: PTFR O-rings; Viton

| Body size  | Size       | Order No. |  |
|------------|------------|-----------|--|
| KH 01/6-02 | 1/4" NPT   | 268443    |  |
| KH 01/6-03 | 3/8" NPT   | 268444    |  |
| KH 01/6-05 | 1/2" NPT   | 268445    |  |
| KH 01/6-07 | 3/4" NPT   | 268446    |  |
| KH 01/6-10 | 1" NPT     | 268447    |  |
| KH 01/6-12 | 1 1/4" NPT | 268449    |  |
| KH 01/6-15 | 1 1/2" NPT | 268451    |  |
| KH 01/6-20 | 2" NPT     | 268452    |  |
| KH 01/6-25 | 2 1/2" NPT | 268453    |  |
| KH 01/6-30 | 3" NPT     | 268454    |  |

## **Locking Devices**

Locking devices are available for the KH series ball valves from 1/2" NT up to 2" NPT.

| Description  | Order No. |  |
|--------------|-----------|--|
| 1/2" to 3/4" | 269275    |  |
| 1" to 1 1/4" | 267339    |  |
| 1 1/2" to 2" | 269276    |  |

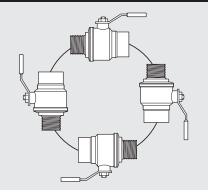

# Mounting

### Installation Position

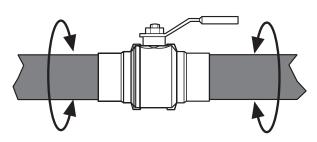

Safety shutoff valve from vertically upright to horizontal.

#### **Recommended Piping Procedure**

- 1. Examine the valve for shipping damage.
- 2. The main gas supply must be shut off before installation.
- 3. The inside of the valve, threads and piping all must be clean and free of dirt and debris. Failure to remove dirt/ debris could result in valve damage or cause improper performance.
- 4. Use new, properly reamed and threaded pipe free of chips.
- Apply good quality pipe sealant, putting a moderate amount on the male threads only. If pipe sealant lodges on the valve seat, it will prevent proper operation. If using LP gas, use pipe sealant rated for use with LP gas.
- 6. Do not thread pipe too far. Valve distortion and/or malfunction may result from excess pipe in the valve body.

- 7. Apply counter pressure only a parallel jaw wrench only to the flats on the flange when screwing the pipe into the flanges.
- 8. Do not overtighten the pipe. Follow the maximum torque values listed below.
- 9. After installation is complete, perform a leak test.

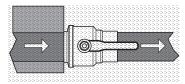

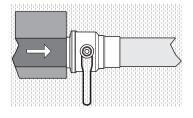

| [lb-in] | Recommended Torque for Piping | 1⁄2" | 3⁄4" | 1"   | 1¼"  | 1½"  | 2"   | <b>2</b> ½" | 3"   | NPT<br>pipe |
|---------|-------------------------------|------|------|------|------|------|------|-------------|------|-------------|
|         |                               | 443  | 752  | 1106 | 1770 | 1991 | 2213 | 2876        | 3540 | [lb-in]     |

## Attention: Mounting Handle on Side

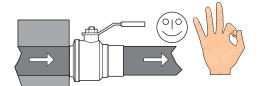

If the ball valve is mounted so that the handle is on the side, as shown to the right, the handle must close the ball valve when actuated downwards as illustrated to the right.

When installing a new ball valve 1" and larger, there is a large amount of torque require to actuate the ball valve first time because of the lack of lubrication on the ball itself. In order to actuate the valve, mount into a vice or on a gas train and turn the handle. Once actuated, the valve is now lubricated and easier to turn.

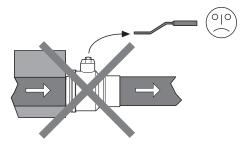

### Never Remove Lever

Never permanently remove the handle from the ball valve.
